

PREVENT
Waste Alliance

Together for a circular economy

Who we are

Launched in May 2019 in Germany, the **PREVENT Waste Alliance** brings together organisations from the private sector, academia, civil society and public institutions worldwide. It serves as a platform for exchange and international cooperation.

Our objectives

We want to contribute to

- **minimising waste,**
- **eliminating pollutants and**
- **reutilising resources in the economy.**

We strive to reduce waste pollution in low- and middle-income countries through developing functioning waste management and circular economy approaches.

We work together for waste prevention, collection, and recycling as well as the increased uptake of secondary resources.

How we work

We **share our knowledge** around the topic of circular economy.

We connect different perspectives and act in **international cross-sectoral partnerships.**

We incubate and pilot **scalable circular economy solutions** worldwide.

We contribute to shaping **international guidelines and standards** for circular economy solutions.

Our working groups

We engage in thematic working groups, in which activities are planned and implemented.
