RETech Representative – Africa Working Group Circular Economy

Dipl. Ing. Hassim Pondor

Role of RETech

German RETech Partnership (RETech) serves as the network of German export-oriented companies and institutions specialized in the waste management and recycling industry. Where the primary focus is on advancing the adoption of innovative and sustainable environmental technologies from Germany's environmental service sector abroad. As a neutral platform, RETech fosters connections between public and private organizations and facilitating access to reliable recycling and waste management solutions.

RETech actively supports the exchange of expertise and cooperation between international markets and German industry leaders. The network acts as a bridge between foreign countries and the German economy, connecting stakeholders with innovative solutions tailored to local needs.

Now, based on his broad industry exposure as Founder & CEO of Trans Africa Services (Mauritius) whilst working closely with multiple German institutions across sectors, RETech herewith confirms Dipl. Ing. Hassim Pondor as an Africa based member of its Africa Working Group for Circular Economy.

In this capacity, Mr. Pondor will facilitate the mandate of RETech and its members on engaging with the Authorities, Association and private sector partners in Africa.

Many thanks for your support and collaboration.

With kind regards

German RETech Partnership e.V.

Beatrice Decker

Head of International Affairs & Project Engineering
